FOREWORD

The data collection programs of the Department of Water Resources have been designed to supplement the activities of other agencies to satisfy specific needs of the State. Bulletin No. 130-66 presents useful, comprehensive, accurate, and timely hydrologic data which are prerequisites for effective planning, design, construction, and operation of water facilities.

The Bulletin No. 130 series is published annually in five volumes. Each volume presents hydrologic data for one of five reporting areas of the State. These areas are delineated on the map to the left.

ACKNOWLEDGMENTS

The records of the climatological observer are used constantly to answer questions and guide the actions of public agencies, agricultural and commercial organizations, and individuals, thereby helping them to benefit from the natural resources of the State of California. Their records also form a basis for preparedness in case of state or national emergencies. The observer who each day faithfully records the readings of his instruments and the weather conditions at his station is performing a very valuable public service.

ABSTRACT

Report contains data collected at climatological stations on precipitation, temperature, wind, and evaporation in Northeastern California. Foldout plates show station locations and type of station, the report area boundary, and the major drainage and hydrographic unit boundaries.

INTRODUCTION

This appendix summarizes monthly precipitation, temperature, wind movement and evaporation data for Northeastern California from July 1, 1965 to September 30, 1966. Twenty-one cooperating agencies and 295 local observers supplied the data. Detailed daily and hourly data not published here are available in the files of the Department of Water Resources.

To insure accuracy, stations are inspected semiannually to see that the equipment is properly maintained and that observations generally are taken in accordance with U. S. Weather Bureau standards.

Each station in this appendix has been assigned an identification number. The letter and first digit denote the drainage basin as shown below. The remaining digits denote the sequence of the station in alphabetical order.

Sacramento River Basin	San Joaquin River Basin	North Lahontan Area
A0 Sacramento Valley Floor	B0 San Joaquin Valley Floor	G1 Surprise Valley
A1 Pit River	B1 Cosumnes River	G2 Madeline Plains
A2 Shasta Lake	B2 Mokelumne-Calaveras Rivers	G3 Eagle Lake
A3 Sacramento Valley West Side	B8 San Joaquin Valley West Side	G4 Susan River
A4 Sacramento Valley Northeast	B9 Sacramento-San Joaquin Delta	G5 Smoke River
A5 Feather River		G6 Herlong
A6 Yuba-Bear Rivers		G7 Truckee River
A7 American River		G8 Carson River
A8 Cache Creek		G9 Walker River
A9 Putah Creek		

TABLE A-1 INDEX OF CLIMATOLOGICAL STATIONS FOR 1965-66

An explanation of the column headings and the code symbols follows:

40-Acre Tract - This denotes the location of the station within the section in which it is located. The letter code is derived from the diagram to the right.

D	C	B	A
E	F	G	H
M	L	K	J
N	P	Q	R

Base and Meridian - The code for this column is as follows:

M - Mount Diablo Base and Meridian

Cooperator Number - This number is assigned from the following list:

000 Private Cooperators
003 Pacific Gas and Electric Company
408 Contra Costa County Flood Control and Water Conservation District
412 East Bay Municipal Utility District
419 Tehama County Flood Control and Water Conservation District
422 Sacramento County
430 Sacramento Municipal Utility District
801 Pomology Department, University of California, Davis
802 Irrigation Department, University of California, Davis
804 California Department of Beaches and Parks
805 California Department of Fish and Game
806 California Department of Water Resources
808 California Division of Forestry
809 California Division of Highways
900 United States Weather Bureau
902 United States Air Force
903 United States Corps of Engineers
904 United States Bureau of Reclamation
905 United States Forest Service
906 United States Agricultural Research Service
907 State Climatologist (Unpublished U.S. Weather Bureau)
911 Military Weather Stations in California

Cooperator's Index Number - This is the number assigned to the station by the agency responsible for or handling the records of the station. The U. S. Weather Bureau number is only shown in this column when it differs from the alpha order number.

County - This is a standard code for California counties and adjacent areas as shown below:

Alpine	02	Lake	17	Plumas	32	Stanislaus	50
Amador	03	Lassen	18	Sacramento	34	Sutter	51
Butte	04	Modoc	25	San Joaquin	39	Tehama	52
Calaveras	05	Mono	26	Shasta	45	Yolo	57
Colusa	06	Napa	28	Sierra	46	Yuba	58
El Dorado	09	Nevada	29	Siskiyou	47	State of Oregon	61
Glenn	11	Placer	31	Solano	48	State of Nevada	62

TABLE A-4 TEMPERATURE DATA

The definition of terms and the abbreviations used in connection with Table A-4 are as follows:

MAX - The highest temperature of record for the month.

MIN - The lowest temperature of record for the month.

AV MAX - The arithmetic average of daily maximum temperatures for the month.

AV MIN - The arithmetic average of daily minimum temperatures for the month.

AVG - The arithmetic average of the daily maximum and minimum temperatures for the month.

\- - Record incomplete.

RB - Record began.

RE - Record ended.

TABLE A-5 EVAPORATION DATA

The definition of terms and the abbreviations used in connection with Table A-5 are as follows:

EVAP - The total amount of water evaporated from the pan in inches for the month.

WIND - The amount of movement of air over the pan in miles for the month.

AV MAX - The arithmetic average of daily maximum water temperatures in degrees Fahrenheit for the month.

AV MIN - The arithmetic average of daily minimum water temperatures in degrees Fahrenheit for the month.

\- - Record incomplete.
